

CAPABILITY STATEMENT

Specialist Bird Management for Industry & Infrastructure

Non-lethal, site-specific bird mitigation for operational, construction and critical-infrastructure environments.

ESTABLISHED

Est. 1989

COVERAGE

North Wales — UK-wide delivery

APPROACH

Humane · non-lethal mitigation

02 OPERATIONAL CAPABILITY

Bird management for complex working environments

Avian Environmental UK delivers specialist bird management for industrial, infrastructure, construction and commercial environments. Founded by Wayne Davis in 1989, the practice combines long-standing falconry expertise with operational site monitoring and adaptive, non-lethal deterrence.

01

Falconry-led deterrence

Genuine predator presence used strategically to influence bird behaviour and support humane displacement.

02

Site monitoring

Operational observation of bird activity, pressure points and changing site conditions.

03

Multi-method mitigation

Falconry supported by laser and bio-acoustic deterrence, with drone-assisted deterrence and lure deployment where relevant.

04

Operational reporting

Clear site records and documentation to support project teams and ongoing management.

Site monitoring — active industrial programme

Laser deterrence

Bio-acoustic deterrence

Drone-assisted deterrence and lure work

TYPICAL SITE REQUIREMENTS

- Nesting and roosting pressure
- Gull and pigeon activity
- Contamination and asset impact
- Health and safety risk
- Operational disruption
- Construction, demolition and maintenance works

03 RELEVANT PROJECT EXPERIENCE

Industrial, demolition and operational environments

POINT OF AYR GAS TERMINAL · NORTH WALES · 2026

Three-month industrial bird-management programme

01 Bird pressure

02 Operational environment

03 Mitigation response

Avian Environmental UK delivered sustained bird-management operations across a complex industrial environment, working alongside environmental, operational and demolition teams. The programme used adaptive, non-lethal methods in response to changing bird activity and site conditions.

Contract route	NBC
Duration	3 months
Methods	Falconry-led deterrence · site monitoring · laser · bio-acoustics · vehicle/foot patrols · drone-assisted lure work
Deliverables	Daily operational monitoring and reporting

THE SALESIAN ACADEMY OF ST JOHN BOSCO · LIVERPOOL

Demolition-site gull mitigation

Falconry-led gull mitigation delivered within an active BAM-managed demolition environment, through NBC Environment.

Demolition environment · falconry-led mitigation

BOOKER · BROADSTAIRS

Warehouse and roof-works gull mitigation

Targeted gull management supporting an operational warehouse and active roof-replacement works.

Operational site · monitoring with non-lethal deterrence

04 EXPERIENCE & CREDENTIALS

Established specialist capability

SELECTED EXPERIENCE – INDUSTRIAL & INFRASTRUCTURE

Point of Ayr Gas Terminal	Industrial · 2026
The Salesian Academy of St John Bosco	Demolition
Booker Broadstairs	Operational warehouse

HERITAGE, SPORT & COMMERCIAL

The All England Lawn Tennis Club (Wimbledon)	Sport
Westminster Abbey	Heritage
Lord's Cricket Ground	Sport
Canary Wharf	Commercial estate

CREDENTIALS & DOCUMENTATION

INSURANCE

£10m Public Liability
Insured for operational site work

SITE COMPETENCY

CSCS Green Card
Operational personnel

SUPPLY-CHAIN
REGISTRATION

Sell2Wales Registered Supplier
Wales-based specialist contractor
